Jhan Gómez P.

jhangomez25@gmail.com

(other) jgmezpad@unprg.edu.pe

I am a software engineering student with a focus on frontend development. I am proficient in React with Next.js and React Native with Expo. I am passionate about creating user experiences that strike a balance between being easy to use and lightweight without sacrificing too much quality.

Experience

Freelance React Frontend Developer

Remote

Freelancer

Lambayeque, Peru

Sep 2023 - Present

- Developed landing pages, ensuring high conversion rates and brand alignment.
- Architected and built a fully-functional platform utilizing best practices (e.g., component reusability, state management) for optimal performance and maintainability.
- Contributed effectively in team meetings, actively participating in planning discussions and collaborating on project goals.

React Native Junior Frontend Developer

Remote

Bartebi/Agrokasa

Lima, Peru

May 2023 - Jun 2023

- Built mobile applications using JavaScript and the React Native framework, leveraging libraries like Material UI's Paper for robust and attractive UIs.

React Junior Frontend Developer

Remote

Bartebi/Agrokasa

Lima, Peru

Feb 2023 - May 2023

- Developed dynamic and user-friendly front-end elements using JavaScript and the React framework, incorporating libraries like Material UI for consistent appearance and interactive features.
- Integrated external APIs seamlessly to enhance functionality and data flow within the platform.
- Collaborated effectively in team meetings, contributing to planning sessions and project management.
- Demonstrated punctuality, responsibility, and commitment to deadlines, consistently exceeding expectations and taking ownership of assigned tasks.
- Thrived in a remote work environment, showcasing excellent self-discipline, adaptability, and a strong learning appetite.

Documentation Manager

Remote

Agencia Consigue Ventas Online

Lima, Peru

Dec 2022 - Feb 2023

- Designed, implemented, and managed the documentation for the agency's various departments.
- Led and coordinated the documentation team.
- Advised the agency's departments on documentation matters.
- Promoted a culture of documentation management and structuring within the agency.

Documentation Analyst

Remote

Agencia Consigue Ventas Online

Lima, Peru

Aug 2022 - Dec 2022

- Collected, analyzed, and organized the necessary information for documentation.
- Prepared documentation using established formats and standards.
- Updated documentation on a regular basis.
- Provided feedback to users on the documentation used.

Technologies and Languages

- Languages: JavaScript, Typescript, Python, React Native
- Technologies: ORM Prisma, Postgresql, GraphQL, Git, Next.js, Nexus, Expo
- Other: Data Structure, Tailwind, Material UI

Education

- **Systems engineer student**, Universidad Nacional Pedro Ruiz Gallo, Lambayeque, Perú. **2019 - Present**

Projects

- [Sensors Expo Typescript](#): This is a simple project that uses the examples of expo sensors with respect to react native, but adapted for typescript, this project will be constantly modified for the future to train a neural network model through the data collected from the sensors. This will be a topic to present before a scientific conference.
- [Quatu](#): This is a project that has been in development since December 2023, powered by next.js typescript with React, nextUI styles along with tailwind. It manages a server with a GraphQL API, with which requests are transmitted to the database, this is managed by the Prisma ORM.
- [Quatu GraphQL Server](#): This is the graphql server powered by Apollo Server, on which all Quatu requests are made.
- [Developer portfolio \(Other link\)](#): This is my portfolio or CV on the web, it works with next.js typescript with React, nextUI styles along with tailwind, it is being modified to adapt different languages through i18n.
- [Hanpy](#): Just a landing page designed by me.
- [GamarraStore](#): Just a landing page design by me, it's still in development. It's a Quatu development.
- [Harkaysoft](#): Just a landing page designed by me. It's still in development.
- [Limby](#): It's my first landing page design by me.
- [Datrack](#): I am helping to create the landing page.

Social

- [Github](#): My personal github, where I host all my repositories
